

Komet's promise to you:  
Compatibility with your  
power system.

---

# Komet ultrasonic tips and your power system. A perfect match – and that’s a promise.

---

Some manufacturers of power systems urge you not to use anything other than their own accessories.

Please don't let that confuse you. Keep trusting in the outstanding quality made by Komet, and be assured that our ultrasonic tips were made to perfectly match your favorite power system. That's a promise.

## **Our promise: A commitment to quality**

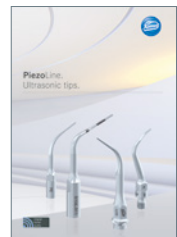

Komet has been a renowned specialist for dental instruments worldwide since 1923. Our quality meets the highest standards.

## **Our promise: A commitment to testing**

Not a single product leaves our house without having been thoroughly tested throughout its entire development process – for quality and for compatibility with a range of different power systems. Apart from the tests stipulated by the relevant DIN standards, our specialists put our instruments through a series of trials, from long-term endurance tests to extensive application tests. Like this, we ensure that you can use our instruments in your power system without any worries.

## **Our promise: A commitment to expert advice**

Please ask us if you have any doubts or queries. Our expert staff will be pleased to help.

For further information on our range of ultrasonic tips, please order our PiezoLine brochure (411782).
