

IES

International Endodontic Summit

Advancing Scientific Excellence

**BERLIN
2026**

October 1–2
Hotel Oderberger

**Be Part of the
Future of Clinical
Endodontics**

FOCUS OF THE SUMMIT

The International Endodontics Summit brings together science, innovation, and clinical practice to explore the future of endodontics, delivering evidence-based insights that integrate seamlessly into your daily workflow.

Evidence Scientific findings and clinical research shape decision-making in modern endodontics.

Excellence A workflow-based programme that covers the entire endodontic treatment process, from diagnosis to post-endodontic restoration.

Evolution Advances in AI, digital diagnostics and technologies that can take your practice to the next level.

Why Attend?

- Shaping the future of endodontics through an evidence-based, workflow-oriented scientific programme.
- Advance your endodontic knowledge with applicable insights, while earning 14 CE.
- Opportunity to network with international experts.
- A premium congress experience in a unique Berlin venue designed for scientific focus and depth.
- Limited to 300 participants.

Scientific Coordinator

Prof. Massimo Gagliani, Scientific Coordinator

»The IES was created to foster scientific depth, structured clinical thinking and meaningful professional exchange. With a clear focus on advancing endodontic excellence and translating evidence-based knowledge into everyday clinical practice.«

Programme Overview

A scientific and workflow-based programme over two days.

Day 1

Scientific Perspectives & Clinical Foundations

- AI and digital diagnostics in modern endodontics
- Vital pulp therapy and evidence-based daily practice
- From academic research to chairside application

Day 2

Advanced Workflows & Future Directions

- Retreatment, microsurgery and complex clinical decisions
- Post-endodontic restorations and interdisciplinary workflows
- Materials and technology for modern and efficient endodontics
