

Program October 1 (Thursday)

»Scientific Perspectives & Clinical Foundations«

Opening

Two days. Thirteen experts.

Every major question in endodontics – answered.

With a clear focus on translating evidence-based knowledge into everyday clinical practice.

Prof. Massimo Gagliani
Scientific Coordinator
Italy

Out of the box: AI in Dental Practice

Work faster. Decide better. Stay in control.

AI supports diagnostics, documentation and clinical decision-making in real time – reducing manual workload and increasing precision without changing how you practice. The result: more efficiency, focus, and better use of clinical expertise.

Florian Holste
Germany

AI & Endodontics: Diagnostic & Future Applications

See more. Miss less.

AI-powered imaging detects apical lesions, root fractures & complex canal anatomy earlier – helping you make more reliable decisions & avoid missed diagnoses in daily practice.

Dr. Sascha Herbst
Germany

BREAK – Coffee & Learn

Adult Pulpotomy: The Paradigm Shift

Save time. Preserve tooth structure. Avoid unnecessary RCTs.

Irreversible pulpitis and still no root canal treatment? New bioceramic materials and a deeper biological understanding of pulp regeneration are rewriting the treatment algorithm. For predictable outcomes and less invasive treatment in your daily practice.

Dr. Gregory Fejoz
France

Day by Day endodontics

Know what works. Use it tomorrow.

Identify which techniques and materials actually improve predictability – and how to apply them directly in your daily treatments. For more confidence in clinical decisions and more consistent outcomes.

Prof. Dr. Sebastian Bürklein
Germany

Timing in Endodontics: The Efficiency Rule

Your shortcut to better endo.

Endo often takes too long, is difficult to plan, and blocks valuable chair time. Step-by-step protocols, practical tips and real clinical shortcuts help you work more efficiently, reduce treatment time, and keep your schedule under control.

Dr. Benjamin Boulblil
France

Program October 2 (Friday)

»Advanced Workflows & Future Outlook«

Bioceramic Sealers: New Horizons

Achieve 3D obturation. Without mastering complex techniques.

3D obturation without warm compaction? Bioceramic sealers are fundamentally changing the technique sensitivity of root canal obturation. Making high-quality outcomes more accessible and easier to achieve in everyday practice.

Dr. Rafaël Michiels
Belgium

Beyond the Limits in Severely Compromised Teeth: An Endo-Rest Journey

Know when a tooth is worth saving.

Clear decision criteria and risk assessment tools help you evaluate compromised teeth and select the appropriate treatment strategy. For more predictable outcomes and confident decisions in complex cases.

Dr. Alessandro Fava
Italy

Dr. Marco Veneziani
Italy

BREAK – Coffee & Learn

Therapeutic Strategies for Endodontic Treatment Failure

When endo fails – what's next?

Learn how to identify the underlying causes of endodontic failure and select the appropriate treatment approach. From retreatment to apical surgery or intentional replantation. For structured decision-making in challenging cases.

**Prof. José Antonio
González Sánchez**
Spain

Dr. Guillermo Doria
Spain

BREAK – Lunch & Learn

Adhesive Endo-Restoration: Indications, Protocols & Boundaries

Protect what you built.

Even a well-executed root canal treatment can fail if the restoration doesn't protect the result. Practical protocols for immediate adhesive restoration – helping you stabilize treated teeth, reduce reinfection risk, and secure long-term success directly after endodontic treatment.

Dr. Daniel Černý
Czech Republic

CAD/CAM in Post Endodontic Restorations

From root canal to final restoration – in one session.

Digital workflows enable immediate definitive restorations following endodontic treatment. Reducing risk, saving time, and avoiding temporary solutions. Minimally invasive, precise, and efficient.

Dr. Rupert Austin
United Kingdom

ROUND TABLE – Open discussion . Your questions. Their answers.

All speakers. All topics.

The opportunity to validate, challenge and apply what you've learned.
